Frontend developer with experience in migrating, maintaining and optimizing websites to Next.js, focused on improving the performance and scalability of websites. Currently, at Mutual de AMR, I work improving user experience by developing and maintaining frontend components, collaborating with design and development teams to implement responsive and efficient solutions. In addition, I am doing backend studies in .NET to expand my knowledge and bring more value to my work.

PROFESSIONAL EXPERIENCE

La Mutual de AMR

FrontEnd developer

Rosario, Argentina

November 2023–Currently

- Progressive migration of existing functionalities and pages to Next.js architecture, optimizing website performance and scalability.
- Development and maintenance of components and frontend pages using Next.js to improve the user experience and efficiency of the Mutual's website.
- Close collaboration with the design team and other developers to implement responsive and functional designs that meet quality and usability standards.

Neoris Argentina
